

## Child Advocacy Center Acknowledgment

I understand that [type student name into the shaded box] (referred to hereafter as the student) will be participating in the Midwest Regional Children’s Advocacy Center (MRCAC) child abuse medical preceptorship. I understand that upon completion of the program, the student will be enrolled in the [myCasereview](#) program, an anonymous online peer review program where they can submit all of their child sexual abuse cases for review by an expert board-certified child abuse pediatrician. MRCAC requires that the student upload at least 25 cases for review and/or participate for at least two years (the first year will be at no charge) in this program **OR** that they have an *advanced medical consultant* (see text box below) review their first 25 cases. While myCasereview is anonymous in the fact that the clinician and reviewer(s) are blinded to each other, there is a safety mechanism in place that if there is concern expressed by the reviewer(s) in more than three submitted cases, that anonymity will be broken so that we can reach out to the clinician and CAC director to offer remedial steps to build upon the clinician’s current knowledge to ensure the clinician’s competency.

### Advanced Medical Consultant Qualifications

According to the National Children’s Alliance (NCA) medical standard for accreditation, an advanced medical consultant is a child abuse, physician, or advanced practice nurse who:

- Meets the minimum training standards for a CAC medical provider (a child abuse pediatrics sub-board eligible individual or certification; physicians without board certification or board eligibility in the field of child abuse pediatrics, advanced practice nurses, physician assistants should have a minimum of 16 hours of formal didactic training in the medical evaluation of child sexual abuse; SANEs without advanced practitioner training should have a minimum of 40 hours of coursework specific to the medical evaluation of child sexual abuse followed by a competency based clinical preceptorship).
- Has performed at least 100 child sexual abuse examinations.
- Is current in continuing quality improvement (continuing education and participation in expert review on their own cases).

I further understand that ~~[type medical supervisor name]~~ has agreed to serve as the Medical Supervisor of the student.
